

Contextualizing AI: The Power of RAG

Comparing AI responses with and without document context to demonstrate how grounding transforms reliability.

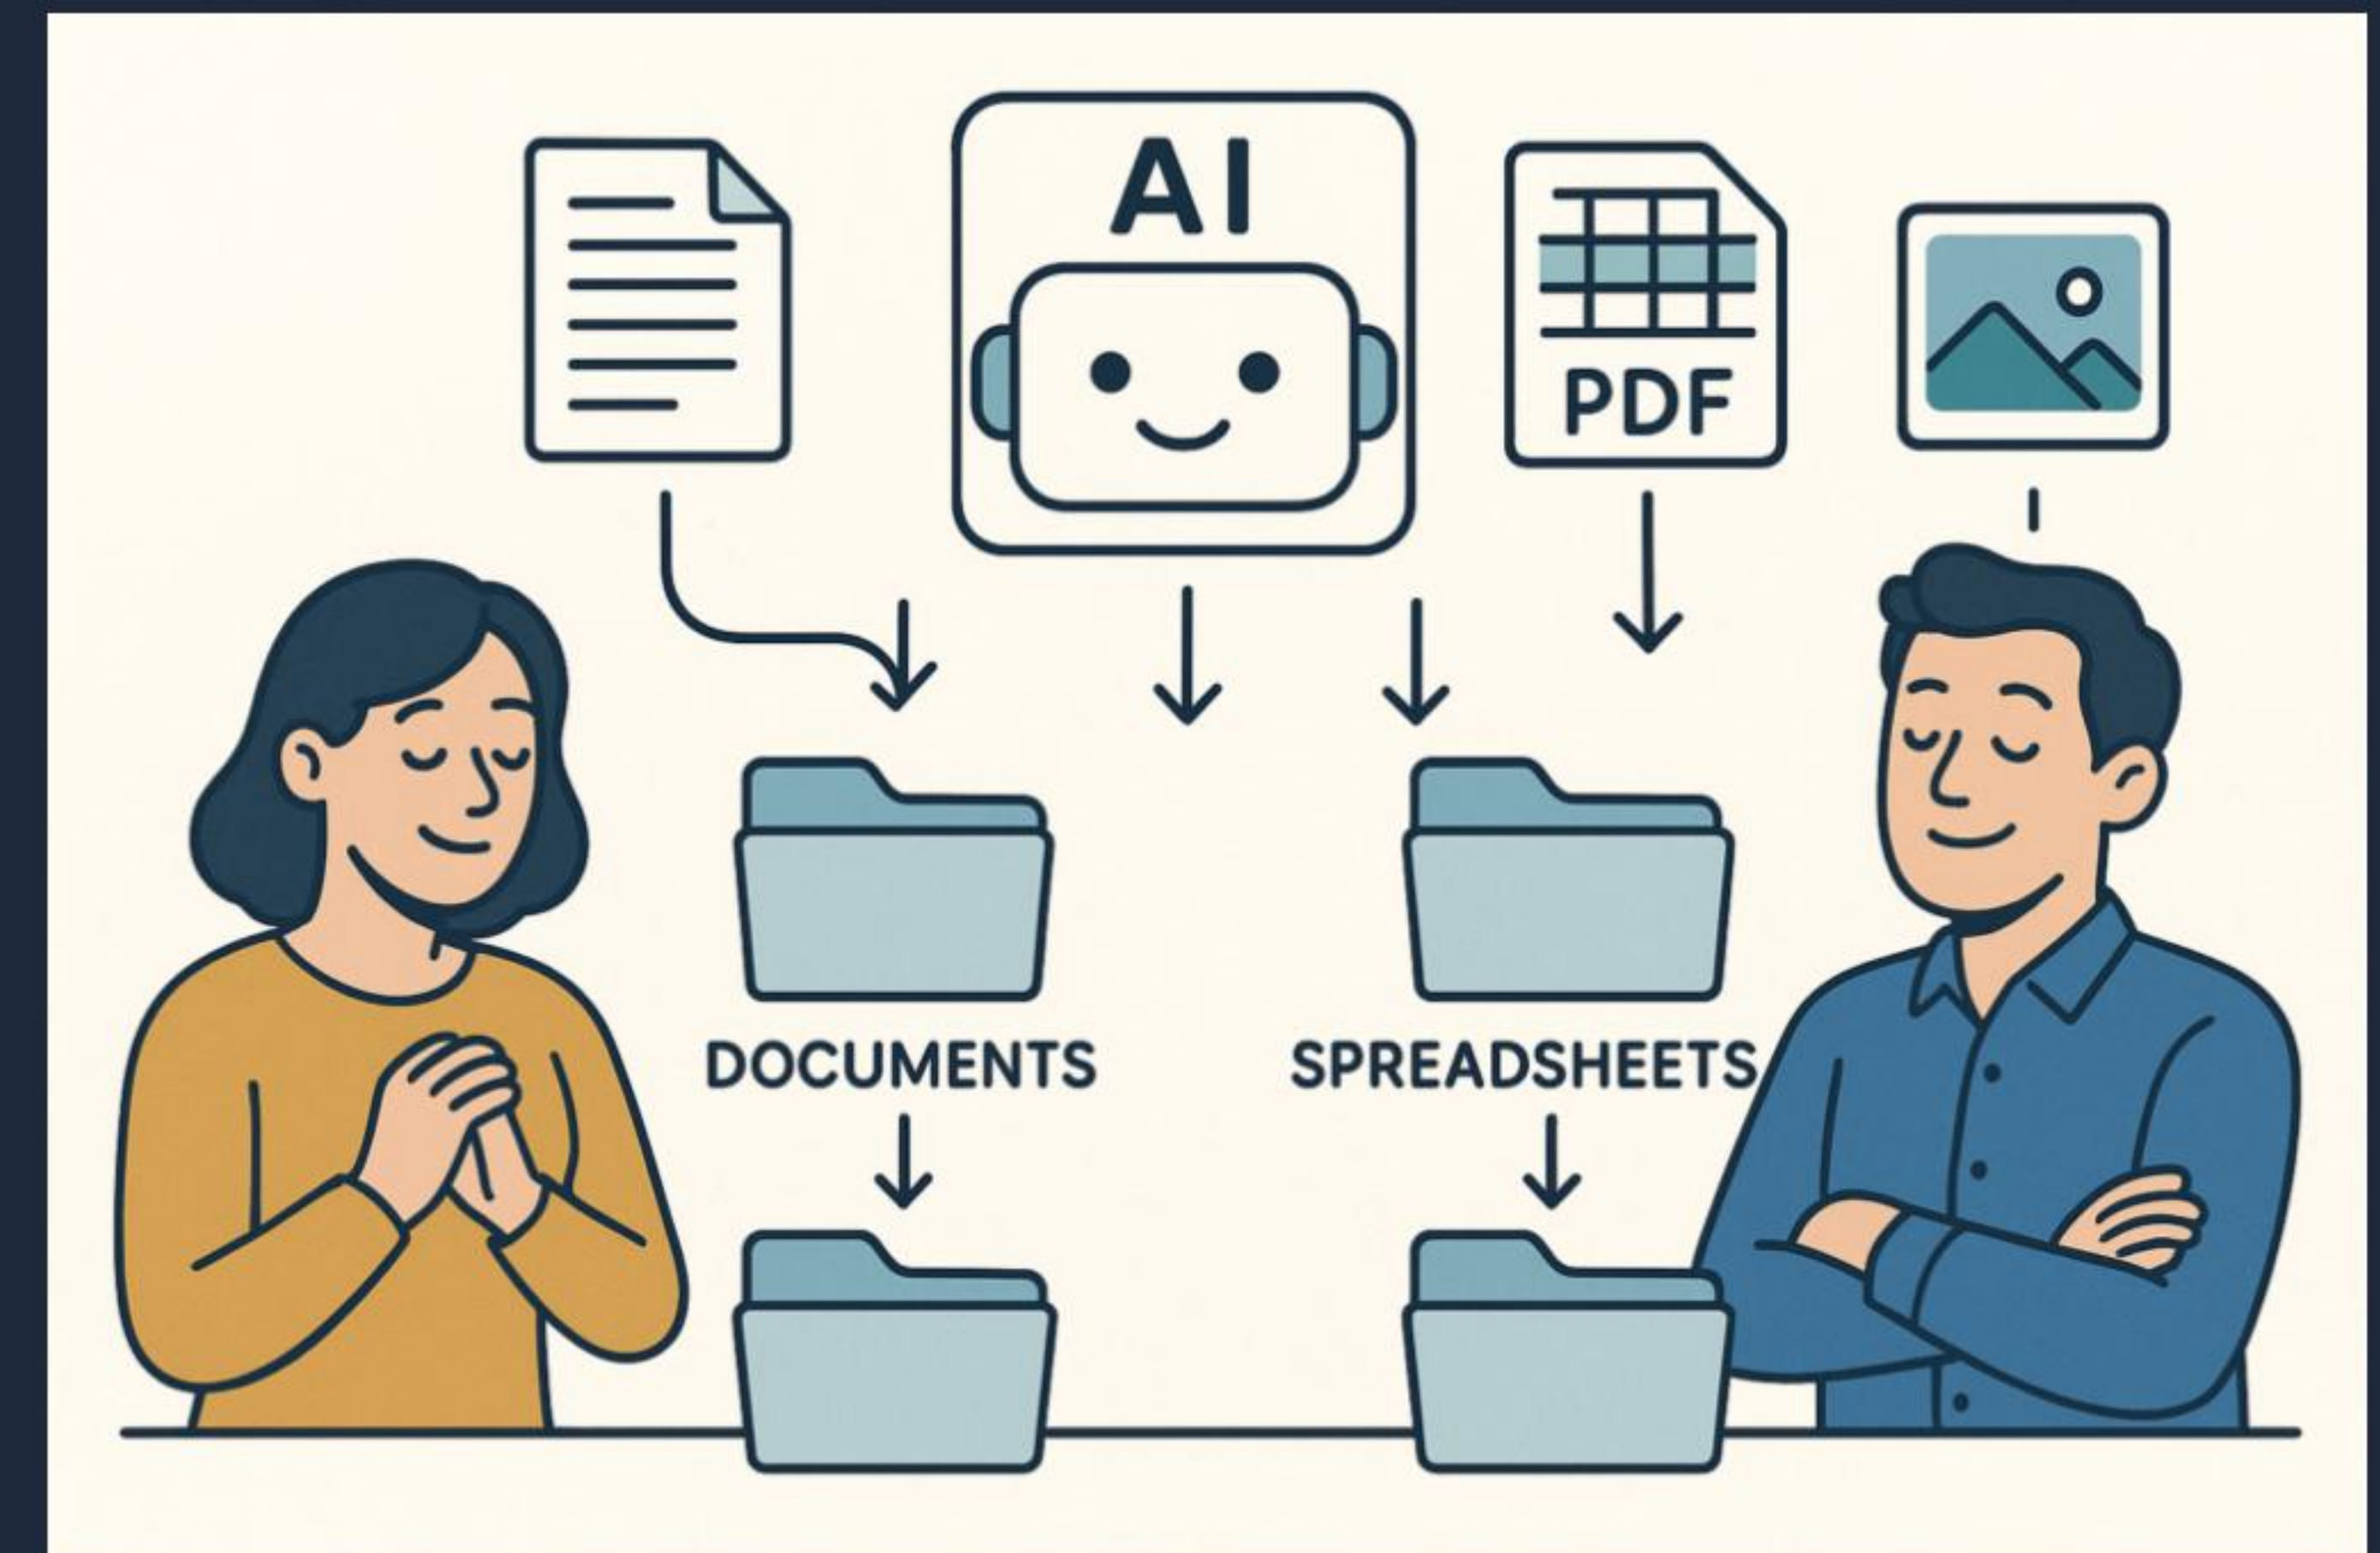

How I Tested the Difference

I asked the exact same three questions in two distinct scenarios:

- ✗ **Without Documents:** Relying purely on the AI's general training data.
- ✓ **With Documents (RAG):** Providing target documents as context.

Practice Documents Used:

- 📄💰 Pricing Document
- 📄🛡️ Cancellation & Refund Policy
- 🛡️ Security & Support Policy

Example 1: Product Pricing

USER QUESTION

"Which plan should a 12-person team choose?"

NO CONTEXT

AI Response

"A 12-person team should probably choose a team or business plan, depending on the platform's pricing structure. The best choice would be the plan that supports at least 12 users..."

Observation:

Cevap genel kaldı. Net bir fiyat, paket adı veya kullanıcı limiti vermedi. Çünkü modelin elinde platforma ait gerçek doküman yoktu.

WITH RAG

AI Response

"According to the Pricing Document, a 12-person team should choose the Business Plan. The Business Plan supports up to 20 users, costs \$199/month, and includes priority support."

Observation:

Bu cevap çok daha net oldu. Paket adı, fiyat, kullanıcı limiti ve özellikler açık şekilde belirtildi.

Example 2: Refund Policy

USER QUESTION

"What happens if a user cancels after 10 days?"

NO CONTEXT

AI Response

"Usually, if a user cancels after 10 days, access may continue until the end of the billing period. Refund policies differ by company. Some platforms offer refunds... while others do not."

Observation:

Cevap mantıklı ama kesin değil. "Usually" ve "may" gibi ifadeler kullanıldı. Bu da cevabın tahmine dayalı olduğunu gösteriyor.

WITH RAG

AI Response

"Users can cancel anytime and keep access until the billing period ends. Refunds are only available within the first 7 days. Since the user cancels after 10 days, they will not receive a refund unless there is a billing issue."

Observation:

Bu cevap belgedeki kurallara dayanıyor. İade süresi, erişim süresi ve istisnai durumlar net şekilde verildi.

Example 3: Data Privacy

USER QUESTION

"Is uploaded company data used to train the public AI model?"

NO CONTEXT

AI Response

"Many AI platforms state that customer data is not used to train public models, but this depends on the company's privacy policy. The user should check the official documentation."

Observation:

Cevap güvenli ama kesin değil. Model net cevap veremedi çünkü güvenlik politikasına ait belge verilmedi.

WITH RAG

AI Response

"According to the Security & Support Policy, uploaded company documents are stored inside a private workspace and are not used to train the public AI model."

Observation:

Bu cevap doğrudan güvenlik dokümanına dayanıyor. Belgesiz cevapta sadece tahmin vardı, burada ise net politika bilgisi var.

Comparison of Two Results

EVALUATION CRITERIA	WITHOUT DOCUMENTS	WITH DOCUMENTS (RAG)
Accuracy	Genel olarak doğru, ama kesin değil	✓ Dokümana dayandığı için daha doğru
Specificity	Paket, fiyat, süre gibi detaylar yok	✓ Fiyat, iade süresi, limitler net
Grounding	Model genel bilgisini kullanıyor	✓ Cevaplar verilen dokümanlara dayanıyor
Hallucination Risk	Daha yüksek (Model tahmin yapabilir)	✓ Daha düşük (İçeriğe bağlı kalıyor)
Business Trust	İş ortamında tek başına güvenilir değil	✓ Gerçek iş senaryosu için daha güvenilir

Why RAG Matters: Reducing Guesses

1. User Question

The user asks a specific question requiring internal business knowledge.

2. Document Retrieval

The system actively searches and extracts relevant parts from targeted documents.

3. Contextual Answer

The AI uses the retrieved text as direct context to generate a reliable, grounded response.

Best Use Case: Enterprise AI

Yapay zekâ güçlü bir model olsa bile, elinde doğru bağlam yoksa genellikle genel cevaplar verir. Bu cevaplar iş ortamında yeterince güvenilir değildir.

Doküman verildiğinde **(RAG yaklaşımı)** cevap kalitesi belirgin şekilde artar. Yapay zekâ tahmin yapmak yerine verilen bilgiye dayanarak cevap üretir.

Final Verdict: RAG is essential for customer support, internal policies, pricing strategy, and legal documentation.
